Specialists in effective inhalation

PARI O-PEP

Efficiently loosens bronchial mucus and helps clear the airways

For temporary use to mobilise secretions in acute or chronic diseases of the lower airways, such as cystic fibrosis, bronchiectases, COPD and asthma

- Comfortable treatment with oval mouthpiece
- Alleviates unproductive coughing and shortness of breath
- Including small bag for hygienic storage and safe transport
- Dishwasher-safe and autoclavable

Item No. 018G5000

Using the PARI O-PEP

Assembly

- Insert the funnel in the lower section.
- Place the ball in the funnel.
- Screw the upper section onto the lower section.

Performing treatment

- Sit in an upright, relaxed position.
- Place the mouthpiece between your teeth and enclose it with your lips.
- Breathe in slowly and deeply through your nose. Hold your breath for about 1 to 2 seconds.
- Breathe out slowly and completely into the PARI O-PEP through your mouth. While exhaling, tense your cheek muscles and keep your cheeks rigid.
- Repeat the cycle of breathing in and out for 10 to 15 breaths.

In order to benefit fully from the therapeutic effect of the PARI O-PEP, always carry out the treatment as instructed by your doctor or therapist.

Please follow the instructions for use in all cases. They are provided with all devices and include a detailed description. If the instructions for use are lost, new copies can be downloaded at www.pari.de, or you can call 1800 26 22 13.
